PROFILE

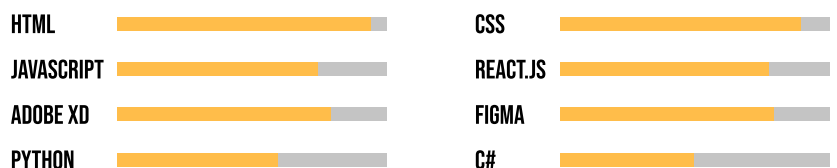

My name is Faruq Bakare, I'm from Lagos, Nigeria. I love designing and building websites and applications and I'm a React.js and css nerd. I got into web development about half a year ago and immediately got hooked with the instant visual feedback development. I have since then just kept on learning and building a lot of projects from landing pages, to games to web-apps (blesstheboy.com/projects). I think I am now ready and would love to work for your company as a Frontend Web Developer.

EXPERINCES

- TD-MATRIX SOLVER (MOBILE APP) - 2019**
Designing, building, testing and deploying of TD-Matrix Solver - a cross-platform mobile application built with Xamarin. I designed the app as a solution to tedious Tri-diagonal matrix solving and numerical computations. It was my first programming project and the app is available here on the Playstore.
- TEACHING & TUTORING 2017 - PRESENT**
Catalyst Tutorials, Seyi Tutorials, Midas Tutorials.
I teach Mathematics, Physics and other Engineering courses at tutorials.
- FREELANCING (WEB) - 2020**

HERE'S A LINK TO MY PORTFOLIO THAT CONTAINS MOST OF MY PROJECTS
