From the moment I produced 'Hello world' on the console for the first time while I was taking a programming course in my second year. I knew I was hooked to the world of software development.

Before the end of that semester, I had gone from zero to designing, building and publishing a [cross-platform mobile app](#) for my course-mates for solving matrices and performing numerical computation on their mobile devices. Software development has since then grown to be a job, a hobby, a passion and an amazing challenge for me to keep, learning and building high-quality software that provides value.

Below you'll find projects that showcase my skills and general background in developing software. Or click [here](#).

Relevant Experiences

Portfolio Website

 [Visit link](#)

 [Github link](#)

 [Design link](#)

My personal portfolio site. Designed using Figma. Built using React, Sass and Styled Component (for theme toggle and dynamic styles). The animations were done using CSS animation and GSAP.

Rock Paper Scissors

 [Visit link](#)

 [Github link](#)

A fun rock paper scissors game. Built using React. Animations were done using CSS animation library. Also uses caches scores so they remain after refresh and on next visit.

Shortly

 [Visit link](#)

 [Github link](#)

A fully functional link shortener. User authentication using email and google by using firebase authentication. Link shortening and tracking using [Rebrandly](#) API and Firestore.

Google Docs Clone

 [Visit link](#)

 [Github link](#)

Fully functional Google Docs clone built using Next.js. User authentication using Next Auth and backend and database using Firebase Firestore.

Skills

Proficient in: **Javascript** **React.js** **Next.js** **Node.js** **Git** **API**

Experience in: **UI/UX** **Python** **C#**

Education

Bsc. Mechanical Engineering

University of Lagos

CGPA: 4.57
